# Spontaneous application (mine)

## Description du poste / Job description :

### Come and join us to transform your career.

At Nemaska Lithium, we transform lithium spodumene into lithium products of exceptional purity. But we're especially proud to say that we're also transforming much more than that.

We're transforming the future into a cleaner, healthier and more environmentally responsible place. We're transforming workplace relationships into true friendships. We're transforming jobs into careers and careers into life-defining choices. We're transforming work breaks into playtime, Monday mornings into Friday afternoons and "I'm here for the pay cheque" into "I'm here because it looks amazing." We're transforming our teams' ideas into feasible solutions. And we're transforming ourselves through our contacts with our communities by transforming our talk into concrete supportive action.

### \*Call for applications for possible positions at the Whabouchi mine in :
